# 2011-2012 SEWER MAIN REHABILITATION PROJECT (PHASE 1)

Included in the City's Capital Improvement Program is a sewer main rehabilitation project comprised of constructing a new sewer main in three (3) streets in the City's Sand Section (see map). The sewer project work will take place in the roadway and/or sidewalk areas at the following locations:

- 1. Alma Avenue: from 24<sup>th</sup> Street to 27<sup>th</sup> Street
- 2. Marine Avenue: from Highland Ave to Grandview Ave
- 3. 24th Street: from The Strand to Highland Ave

The purpose of this project is to replace the sewer mainlines that are undersized and deteriorated. The sewer main replacement will reduce maintenance and the potential for sewage backups within the project area. In addition, the new sewer mainline will be constructed in the roadway or walkway street in order to reduce the potential for future excavation within the encroachment area. The proposed construction will primarily consist of the installation of the new sewer mainline, reconnection of existing house service laterals and restoration of existing surface improvements. The existing (old) sewer main will be abandoned in place.

#### **UPDATED PROJECT SCHEDULE**

Alma Ave: May 21 – June 29 COMPLETED
 Marine Ave: July 2 – September 14 COMPLETED

## 3. 24<sup>th</sup> Street: September 17 – December 14

The above dates are project schedule UPDATES. Residents within the immediate, affected construction areas will be notified at least 72 hours in advance and as the work schedule progresses. Please make note that each street location will take approximately 45 working days to complete the sewer replacement and final pavement restoration will follow after new sewer is operational.

During the construction period, a City representative will be available to provide assistance to residents/business owners and coordinate the work. The Contractor will be permitted to work from 7:30am to 5:00pm on weekdays in order to assure completion of the project on time.

#### **GENERAL TRAFFIC IMPACTS**

Due to the nature of the work, traffic lane closures may be required throughout the various phases of construction. A minimum of one lane of traffic will be maintained. No-parking signs and street closure will be posted 72 hours prior to commencing each location. Also, when required, access into and out of intersecting local streets will be temporarily restricted to complete the work. Provisions in the contract require that the Contractor maintain access to residences in the work area; however, access to some driveways may be temporarily limited due to the adjacent sewer construction.

#### FOR MORE INFORMATION

The Public Works Department welcomes any inquiries you may have regarding the project. Should you require any further information, please feel free to contact **Mr. Gilbert Gamboa at (310) 802-5356**. This project represents another improvement in the City's wastewater (sewer) system. Construction is almost always an inconvenience; for that reason, your cooperation and patience during the construction period will be greatly appreciated. Thank you for your time and understanding.
