

**PROBLEM STATEMENT:** Downtown Manhattan Beach is suffering from a continuous cycle of parking supply expansion followed by increased demand and visitation. The end result is the parking situation may keep locals away from the area and it creates a “search and circle or hold” vehicular pattern that adds congestion and noise, lowers air quality, and increases parking frustration.

Please place a sticky dot on your top *THREE* solutions.

SOLUTIONS

<p>Add technology improvements that measure and display “available number of parking spaces” signs at parking structure and lot entrances.</p> <div>Place your sticker here</div>	<p>Create shuttle/valet/rideshare drop-off areas to encourage use of employee shuttles and ridesharing, without impacting flow of traffic.</p> <div>Place your sticker here</div>	<p>Install bike racks and bike parking corrals throughout Downtown to accommodate bikeshare and regular bike parking needs.</p> <div>Place your sticker here</div>	<p>Encourage walking by improving pedestrian walkways and crossings through the use of 4-way/diagonal pedestrian crossings (“scrambles”), warning signs, signals, lighting etc.</p> <div>Place your sticker here</div>	<p>Encourage biking by improving/adding bike facilities such as sharrows, bike lanes, and buffered/protected bike lanes.</p> <div>Place your sticker here</div>	<p><b>Do you have other suggested solutions?</b> If so, please write them below:</p> <div>Place ideas here</div>
