## **AMI EQUIPMENT**

#### PROVEN TECHNOLOGY

#### **CURRENT PROCESS**

 Currently manually read approximately 13,500 water customers through bi-monthly billing.

No "real-time" data.

#### BENEFITS OF AUTOMATED METERS

- "Real Time" data
  - Leaks
  - Tampering
  - Backflow
- Minimizes water loss

SAVE ME!

### **UNDER-THE-GLASS TECHNOLOGY**

Typically no wires or antenna needed

Safer than manual reading and AMR

Dedicated data signal

20-Year warranty

Utilization of meters less than five years old

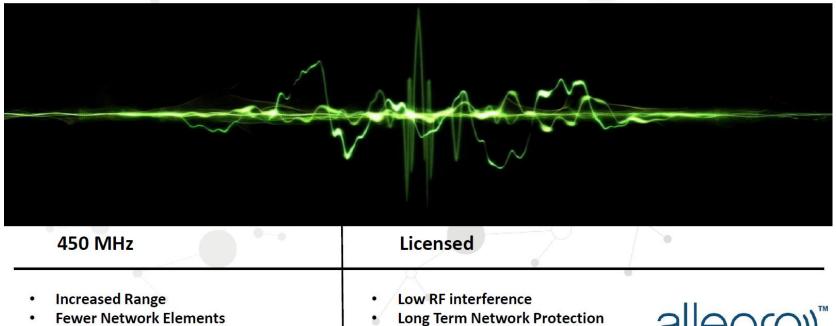

#### 450 MHz Licensed Spectrum

**Protected Spectrum** 

#### **UTILITY CONTROL CENTER-DASHBOARD**

- Reception quality
- Total Consumption (and rainfall comparison)
- Consumption map
- Alerts and critical alerts

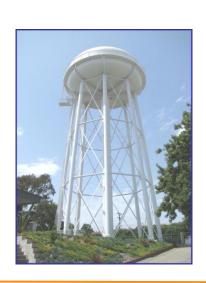

### **CUSTOMER PORTAL**

### **AMI RESEARCH**

- Conducted vendor evaluations.
- Received vendor presentations from leading manufacturers.
- Surveyed surrounding cities.
- Pilot tested.

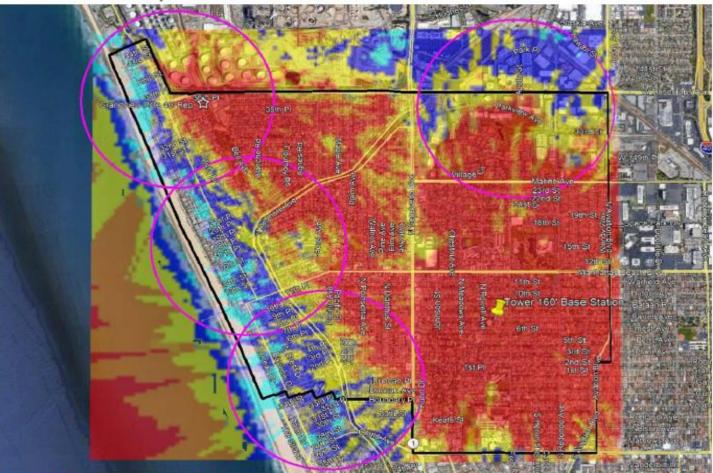

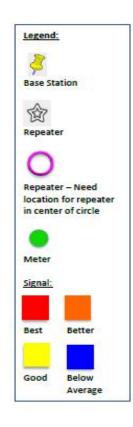

**FEBRUARY 18, 2020** 

#### Manhattan Beach, CA

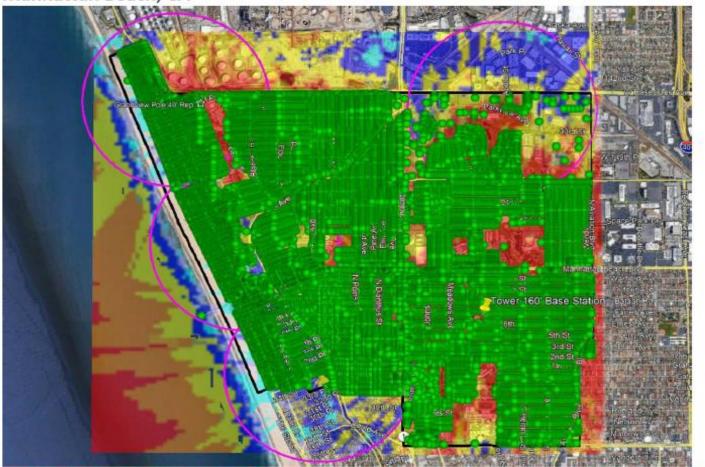

<sup>&</sup>quot;Base Station Antennas MUST be installed at heights indicated on prop study to receive results as indicated above. Any change in height can result in different radio signal strength and read rate results.

#### Manhattan Beach, CA

Legend: **Base Station** Repeater Repeater - Need location for repeater in center of circle Meter Signal: Better Best Good Below Average

<sup>&</sup>quot;Propagation Study/Quote may use existing towers/tanks/infrastructure. If at time of installation infrastructure no longer exists, utility to pay an additional fee for tower installation.

<sup>&</sup>quot;Base Station Antennas MUST be installed at heights indicated on prop study to receive results as indicated above. Any change in height can result in different radio signal strength and read rate results.

Special instructions; duoted quantities per Propagation study completed and approved by Master Meter. Propagation study completed using information provided by Utility and/or Distributor and plotted by Master Meter. Utility to review and approve completed and approved Prop Study, as installation of AMI System will proceed according to data plotted. If any data is incorrect, Utility to provide Master Meter with edits needed. Repeater installation (RHS-ALL-F-INE) price drop if more than one repeater installated without requiring additional rental of bucket truck or other equipment needed for installation. Customer Engagement Portal pricing applies when purchased with Harmony MDM. Proc increases when purchased separately.

Standard Total \$ 164,875.00 Promo Total \$ 12,250.00

New Tower for Base Station pricing subject to change.
