COVID-19 Situation Report

MAY 11, 2021

CURRENT INITIATIVES AND UPDATES

- **Manhattan Beach Vaccination Progress** – 74% of residents age 16 years and older have received a COVID-19 vaccine as of May 7, 2021. Among those numbers, nearly 64% of youth age 16-17 years and 97% of adults age 65 years and older, have received at least one dose of a COVID-19 vaccine. L.A. city is now offering vaccines without appointment for all L.A. County residents. For more information and to find a vaccine location, visit corona-virus.la/VaxAlert.
- **City Hall Appointments and Services** – City Hall is expanding hours to allow for walk-in services and appointments. Virtual services are available 24 hours, 7 days a week on www.citymb.info. Appointments and walk-in services will be available Monday through Thursday from 1:00p.m. to 5:00p.m. and Fridays 1:00p.m. to 4:00p.m. Upon entering City Hall, visitors to the Parks and Recreation, Finance, or Community Development Departments will have a virtual queueing system where visitors will sign in using an iPad or through their smartphone. Visitors will then queue outside or in their car to avoid gathering inside the limited space of the City Hall lobby. The queueing software has texting capability so staff can let the visitor know when it is their turn. Once inside the lobby area, there are visual delineators to denote where to stand or wait.
- **City's Revised Emergency Order on Face Coverings** – Following the County Department of Public Health's revision to the [Health Officer Order](#), the City has issued an [Emergency Order](#) aligning face covering requirements with the County's Order for fully vaccinated people. The [Los Angeles County Department of Public Health](#) provides further information and presents a visual breakdown of [when and where to continue wearing masks](#).
- **Parks and Recreation Programming and Facilities** – The Parks and Recreation Department is ramping up their summer programming. All City programming and facilities are following the L.A. County Department of Health guidelines for safe operations. [Classes and Camps](#), the [Older Adults Program](#), activities at [Manhattan Heights](#), exhibitions at the [Manhattan Beach Art Center](#), and [Facility Reservations](#) are set for summer. For more information visit www.citymb.info.

FEDERAL, STATE, AND COUNTY UPDATES

- Yellow Tier** – Los Angeles County has met the threshold for the least restrictive yellow tier in the [State's Blueprint for a Safer Economy](#). Changes to the Health Officer Order took effect today, May 6, reflecting the County's move into the yellow tier allowing for increased occupancy limits across a wide range of sectors with required safety modifications. Fitness facilities, indoor dining, cardrooms and racetracks, movie theaters, family entertainment centers, breweries, wineries, and craft distilleries can expand indoor occupancy to 50%. Bars establishments are now allowed to open for indoor services at a maximum capacity of 25% or 100 people, whichever is fewer, with no counter seating/service. Amusement parks and fairs can increase capacity to 35%, and waterparks can expand to 40% capacity. Museums and aquariums can increase indoor capacity to 75%. Outdoor live performances and events can increase occupancy to 67% of capacity, while the occupancy limits at indoor live events depend on the total capacity of each venue and the vaccination and testing status of attendees. Other sectors where capacity limits have increased include: private informal gatherings, where the occupancy limit has increased to 50% capacity or 50 people if indoors, whichever is fewer; outdoor gatherings are limited to 100 people. At community sporting events, participation is restricted to 500 people per hour and a total of 1,500 people; if everyone is vaccinated or has tested negative at an outdoor community sporting event, the capacity increases to 3000 people. Office-based businesses and workspaces should limit occupancy to 75% of capacity, unless all staff are vaccinated. Distancing and masking requirements remain in effect at worksites per CalOSHA requirements. At indoor malls, shopping centers, retail stores, hair salons, barbershops, personal care providers, libraries, and limited services, capacity remains limited to 75% to allow for at least 6 feet of distancing among staff and customers. The Health Officer Order requires other modifications across a wide range of sectors. These are modifications focused on infection control, distancing and mask wearing. At all establishments serving food or drink, masking is mandated, except when eating or drinking. Distancing between tables is also still required and counter seating and service is not allowed. Television viewing is now permitted indoors, while live entertainment along with television is permitted outdoors, and aquariums. For more information visit [County of Los Angeles Department of Public Health](#).
- Pfizer Vaccine Approved by FDA for Adolescents age 12 to 15 Years** – The U.S. Food and Drug Administration (FDA) expanded the emergency use authorization for the Pfizer COVID-19

vaccine for adolescents 12 to 15 years of age. Los Angeles County will offer the Pfizer vaccine for 12 to 15 years once the Centers for Disease Control and Prevention (CDC) affirms the recommendation. For a full list of sites across the county offering Pfizer vaccines, please visit <http://bit.ly/PfizerSites> to find a site near you where teens can be vaccinated.

- **Projections in Healthcare / Predictive Modeling** – Los Angeles County [Department of Health Services](#) (DHS) released the COVID-19 Projections of Hospital-based [Health Care Demand May 10 Update](#). The update includes data on hospitalizations through May 5, 2021. The underlying statistical prediction model has been significantly modified to incorporate the effect of vaccination in predicting future hospital demand:
 - The daily number of newly hospitalized patients with positive tests for COVID-19 across Los Angeles County has continued to gradually decrease.
 - Patients are still being admitted to hospitals for reasons other than acute COVID-19 illness who have positive COVID-19 PCR tests, often from prior illness that has been resolved. These do not reflect recent transmission.
 - Based on recent data, reflecting transmission that occurred in the middle of April, the estimated transmission number (“R”) at that time was 0.90 with an uncertainty of 0.78 to 0.99. This estimate for R, lower than prior estimate of 0.96 with an uncertainty of 0.86 to 1.02.
 - Based on the pattern in hospitalizations, and the resulting estimate for R, the demand for hospital-based services including hospital beds, ICU beds, and ventilators over the next 4 weeks is expected to be adequate.
 - Because of the relatively low level of community transmission, the frequency of model updates will continue to be every two weeks.
 - The DHS team’s epidemic model estimates the number of people in Los Angeles County who are susceptible to infection with COVID-19, have been exposed, are infectious to others, and have recovered or been vaccinated so they are no longer susceptible.
 - The model suggests that about 0.06% (uncertainty of 0.03% to 0.10%) of everyone in Los Angeles County is currently infected and infectious to others.
 - This would suggest about 1 in 1600 (between 1 in 4000 and 1 in 970) Los Angeles County residents are currently infectious to others. One week ago, this estimate was 1 in 1200.
 - Approximately 5 in every 8 persons in Los Angeles County is estimated to be protected from COVID-19. Approximately 3 in every 8 persons in Los Angeles County has been infected and approximately another 2 in 8 have acquired protection through vaccination.
- **L.A. County Daily Briefing Statistics on COVID-19** – DPH confirmed 224 new COVID-19 cases and 18 new deaths in [Today’s Daily Report](#). Of the 18 new deaths reported today, five people that passed away were over the age of 80, nine people who died were between the ages of 65 and 79, two people who died were between the ages of 50 and 64, and two people who died were between the ages of 30 and 49. To date, DPH identified 1,235,970 positive cases of COVID-19 across all areas of L.A. County and a total of 24,020 deaths. There are 374 people with COVID-19 currently hospitalized, and 21% of these people are in the ICU. Testing results are available for more than 6,592,000 individuals with 17% of people testing positive. Los Angeles County remains in the yellow tier in the State’s Blueprint for a Safer Economy that allows for expanded re-openings and increased occupancy limits across a wide range of sectors with required safety measures. Today, the State released updated blueprint tier numbers; L.A. County’s adjusted case rate dropped from 1.6 new cases per 100,000 people to 1.4 new cases

per 100,000. The overall tests positivity rate remained at 0.7% and in areas with the fewest health affirming resources, L.A. County's test positivity rate dropped from 0.8% to 0.7%. Los Angeles County has closed the test positivity gap. To view Statewide case statistics and demographics, including positive cases, deaths, and testing results, visit [COVID:19 California Case Statistics](#). As part of its commitment to reduce health inequities and ensure the best outcomes for all Californians, the State has a [Health Equity Dashboard](#) that tracks California's health equity measure and data by race and ethnicity, sexual orientation, and gender identity. The Center for Disease Control and Prevention (CDC) added [County View](#) to their national COVID Data Tracker, providing case statistics by County throughout the United States.
