COVID-19 Situation Report

JULY 8, 2021

CURRENT INITIATIVES AND UPDATES

- **Still Need to Get Your COVID-19 Vaccination?** – Through Thursday, July 8 at county-run vaccination sites, LA City sites, and St. John’s Well Child and Family Center sites, everyone 18 and older coming to get a vaccine will have an opportunity to win one of four packages of tickets and passes to botanical gardens in the area. Each prize package consists of one annual membership to the Huntington Botanical Gardens and one-day passes to Descanso Gardens, L.A. County Arboretum, and South Coast Botanic Garden. For more information visit www.VaccinateLACounty.com.
- **City Council Action on Outdoor Dining Decks** – At the July 6, 2021, meeting, City Council discussed fees for business use of the public right-of-way and extended the citywide waiver until September 7, 2021. [See City Council discussion on the City website.](#)
- **L.A. County Daily Briefing Statistics on COVID-19** – Los Angeles Department of Public Health has confirmed 11 new deaths and 839 new cases of COVID-19. The County’s daily average case rate is now 3.5 cases per 100,000 people, an increase from last week’s rate of 1.74 cases per 100,000. Today’s daily test positivity rate is 2.5%, also an increase from last week’s rate of 1.2%. To date, Public Health identified 1,254,354 positive cases of COVID-19 across all areas of L.A. County and a total of 24,525 deaths. There are 296 people with COVID-19 currently hospitalized. Testing results are available for more than 7,084,000 individuals with 16% of people testing positive.
- **Public Health Data on Vaccinated Population** – In today’s press release, County Public Health indicated, “Given that slightly under 4 million residents in L.A. County are not yet vaccinated, the risk of increased spread remains high. The data to date suggests fully vaccinated people are well protected from severe infections with the Delta variant.” Among 4.6 million fully vaccinated people in L.A. County, Public Health identified 2,822 people who tested positive for a COVID-19 infection contracted more than two weeks after they were fully vaccinated. That means that about 0.06% of all fully vaccinated people tested positive for COVID-19. A total of 195 people, 0.004% of those fully vaccinated, were hospitalized for infections contracted while fully vaccinated. And 21 people died of their infections, 0.0004%.

LATEST NUMBERS ON COVID-19

AREA	CONFIRMED CASES (CHANGE)	DEATHS (CHANGE)
United States ¹	33,604,986 (+20,701)	603,958 (+244)
