COVID-19 Situation Report

JULY 15, 2021

CURRENT INITIATIVES AND UPDATES

- **100% of Manhattan Beach Residents age 65 and Up are Vaccinated** – 24,107 residents in Manhattan Beach have received at least one dose of a COVID-19 vaccine as of July 11, 2021. LA County Department of Public Health has reported 100% of residents aged 65 and up and 81% of residents aged 16 and up have received one dose of the vaccine. For more information, visit [LA County Department of Public Health's Data Dashboard](#).
- **New Mask Mandate Effective Saturday, July 17** – LA County's daily test positivity rate is 3.75%, an increase from a rate of 1.2% on June 15th when physical distancing restrictions and capacity limits were lifted across all sectors. According to the CDC, our daily increase in cases to the high level where we are now puts us in the category of "Substantial transmission". Considering that we have reported over 1000 new cases a day over the last 7 days, this daily average case rate is at a substantial community transmission level without the 7-day lag. For this reason, the Los Angeles County Health Officer Order will be modified to require masking for everyone while indoors, regardless of vaccination status, as Los Angeles County sees more than a seven-times increase in new cases since the June 15 reopening. Wearing a mask when indoors reduces the risk of both getting and transmitting the virus. This additional layer of protection can help to slow the spread and does not limit business occupancy and operations. The L.A. County indoor masking requirements for everyone will be effective Saturday, July 17 at 11:59 p.m. Some exceptions will apply, similar to masking requirements that were in place prior to the June 15 reopening. The modified Health Officer Order will be posted online by Friday, July 16 and will become effective at 11:59 p.m. on Saturday, July 17. On June 15, the day of the full reopening, the County saw 210 new cases and today the Los Angeles County Department of Public Health (Public Health) confirms the highest number of new COVID-19 cases since mid-March with 1,537 new cases. Today's test positivity rate is 3.7%; on June 15, the test positivity rate was around 0.5%. Because of this rapid rise, as well as the increasing presence of the more easily transmitted Delta variant of the virus, and the millions of people potentially at risk of infection, together we must reduce our risk of infection and our risk for potentially infecting others. The order is expected to be kept in place until improvements are seen in community transmission of COVID-19. LA Department of Public Health will be updating the Health Officer Order to reflect the new changes. To view the updated order, visit publichealth.lacounty.gov.
- **Beach Cities Summer Free Fitness Series** – Beach Cities Health District will be offering free yoga classes on the beach, just south of the Manhattan Beach Pier, on Monday July 19 and Monday July 26 at 6:30PM in partnership with the City of Manhattan Beach. The class is free to and registration is required. Participants are asked to bring a mat or towel. Please note Los Angeles County Department of Public Health COVID-19 masking guidelines will be followed for the event. For more information and to register, visit [Beach Cities Health District](#).

- **L.A. County Daily Briefing Statistics on COVID-19** – To date, Public Health identified 1,262,578 positive cases of COVID-19 across all areas of L.A. County and a total of 24,566 deaths. Of the three new deaths reported today, one person that passed away was over the age of 80, and two people who passed were between the ages of 50 and 64. Testing results are available for more than 7,142,000 individuals with 16% of people testing positive. There are 406 people with COVID-19 currently hospitalized and 22% of these people are in the ICU.
