COVID-19 Situation Report

JANUARY 13, 2022

CURRENT INITIATIVES AND UPDATES

- **MANHATTAN BEACH CITY HALL EXTENDS APPOINTMENT-ONLY ACCESS UNTIL JANUARY 31, 2022** - Based on the continued increase in COVID-19 cases and community transmission rates, Manhattan Beach City Hall will remain open to appointment-only access until January 31, 2022. For a complete list of on-line City services or to make an appointment, please visit [Manhattan Beach City Hall Appointments](#). The Police and Fire Department lobby will be closed to visitors until January 31, 2022. However, the Police and Fire Departments are always accessible to the public. In the event of an emergency, please dial 911. For general inquiries, please call the Police Department's main line at (310) 802-5140 or the Fire Department's main line at (310) 802-5200. At this time, public works services will not be adversely affected. In-person recreation programs, parks, tennis courts, fields and community centers will remain open until further notice.
- **NEW ISOLATION AND QUARANTINE SUMMARY TABLES** – The County of Los Angeles Department of Public Health updated the isolation and quarantine requirements and recommendations. Please see the [New Isolation and Summary Table](#) for more details.
- **LATEST PUBLIC HEALTH DATA SHOWS VACCINES ARE STILL THE BEST WAY TO PROTECT AGAINST COVID-19** - According to the latest Public Health data, getting vaccinated against COVID-19 is still the best way to prevent serious illness and death. In L.A. County cases have continued to increase rapidly across all groups however at significantly lower levels for vaccinated individuals. For the week ending December 25th, case rates were much higher for those unvaccinated. There were 991 new cases per 100,000 unvaccinated; 588 cases per 100,000 fully vaccinated without boosters; and 254 cases per 100,000 fully vaccinated with boosters. The vaccine also continues to provide very strong protection against hospitalization and death. One way to evaluate the protection offered by vaccines is rate ratios. These ratios compare rates of an outcome in unvaccinated people with rates of the same outcome in fully vaccinated people. The higher the rate ratio, the more protective the vaccine is against the outcome. The hospital rate ratio was 9 when comparing those unvaccinated vs those fully vaccinated without boosters, meaning a 9-fold higher rate of hospitalization for the unvaccinated compared to this protected group. More markedly, the hospital rate ratio was 38 when comparing the unvaccinated vs fully vaccinated with boosters, meaning those fully vaccinated and boosted were 38 times less likely to be hospitalized than those unvaccinated.

- **L.A. COUNTY DAILY BRIEFING STATISTICS ON COVID-19** – Public Health confirmed 45 additional deaths and 45,076 new cases of COVID-19. Of the 45 new deaths reported today, two were between the ages of 30-49, seven people were between the ages of 50 and 64, 14 were between the ages of 65-79, and 17 were over the age of 80 years old. Of the 45 newly reported deaths, 35 had underlying conditions. Today’s positivity rate is 20.8%. There are 4,175 people with COVID-19 currently hospitalized. Testing results are available for more than 10,494,000 individuals, with 19% of people testing positive. To view Statewide case statistics and demographics, including positive cases, deaths, and testing results, visit [COVID-19 California Case Statistics](#).

LATEST NUMBERS ON COVID-19

AREA	CONFIRMED CASES (CHANGE)	DEATHS (CHANGE)
United States ¹	63,397,935 (+859,139)	842,873 (+2,587)
California ²	6,296,907 (+108,040)	76,804 (121)
Los Angeles County ³	2,131,523 (+45,076)	27,895 (+45)
Manhattan Beach ⁴	3,882 (+68)	20 (0)

The change reflects daily increases, not increases from the prior situation report. The case numbers and deaths reported today may reflect delays in weekend and holiday reporting.
