If what Alison Chavez says is true, and Councilwoman Suzanne Hadley is going to bring a motion to endorse the recall of DA George Gascon, I am in complete agreement with the motion! George Gascon is a disaster, and although he has law enforcement background, there is a move amongst many of the DAs and former Police Chief Charlie Beck to recall Gascon. I am in favor of recalling him and I applaud Suzanne for bringing this to the

Council for consideration and endorsement! Thanks Alison for bringing this to my attention. I and many others think Suzanne's advocacy is what is best for our community !!

WHEN WILL THE MB CITY COUNCIL BE NON-PARTISAN AGAIN?

Why is Suzanne Hadley bringing a motion for the city council to endorse the recall of George Gascon? This is another divisive move by a council member who is more concerned with her upcoming election campaign than Manhattan Beach. This move will burn bridges with Los Angeles County.

As mayor, Suzanne Hadley unilaterally signed a letter opposing George Gascon as if she spoke for the whole council. Now this.

I am a vocal advocate of recalling Suzanne Hadley. She is dangerous for our town. I am told that recalls are a waste of time and money. Elections are how we voice our opinions.

Stand by those words!

As a self-described "numbers gal", Suzanne Hadley cares less about fiscal responsibility than building her political brand.

Please do not allow Suzanne Hadley to hijack the city council for her own political ambitions. Concentrate on Manhattan Beach's real concerns.

While this survey was cheap and fun to read, I hope that little if any of this information is used for any substantive decision-making. While first realizing that a wealthy community will generally provide a higher satisfaction rating, the analysis would benefit from a longitudinal comparison with similarly situated communities, or with earlier surveys. The graphics imply huge disparities in responses where the actual difference is small. There's no drilling down on general responses. And some questions are just inappropriate--do we really think a random survey can provide guidance on how to solve the homeless problem? The racial breakdowns are absurd given our demographics. There are commingling of issues funded by different pots of money (i.e., streets and infrastructure in same question as parks and facilities). At least no one is saying they get their information from street banners.

No matter how you configure this group, if it is not there to push the council and community particularly toward an aggressive approach to control carbon produced and purchased by the city and its residents, it will be ineffective. Must advocate for all detrimental environmental factors, including light, noise, and visual. Needs to address heat island impacts and carbon capture benefits of trees in neighborhoods and business districts. Needs to advocate for efficient transportation solutions.
