I absolutely oppose masking. Indoor or Outdoor. It should be optional if anything. If you feel "unsafe" please wear your mask. It's child abuse to put these on children. There's a reason we were told as youngsters not to breathe in a paper bag. It's dangerous. Breathing your own breath is not good. Most people do not even put on a clean mask each wearing. I've worn a mask a couple times and became nauseous along with having extreme headaches. Children will not know this is not good for them. We should not impose masks on employees. If

someone is ill, they should stay home. It's common sense. Let's start using common sense. If the county imposes Mask Mandates, please show leadership by mandating them on your residents or employees.

I and a majority of residents are opposed to enforcement of mask mandates at this stage and are supportive of Councilmember Hadley's position on this, as are numerous other cities throughout LA County (El Segundo and Beverly Hills, to name two). Those who would criticize Suzanne Hadley for her principled position represent an extremist minority in our community and should be dismissed for no other reason than they apparently suffer from Hadley Derangement Syndrome and, as such, are not worthy of being taken seriously.

It's absurd to even consider masking benefits anyone other than those profiting from selling masks! Look at the timeline for proof: We were shutdown, we pulled our kids out of school, we isolated, we masked, we vaccinated, we masked again, we boosted, we were asked to boost again and WE'RE STILL CATCHING COVID!! Masks do ZERO. We've learned to live with and mitigate adverse reactions/symptoms from covid. Time to move on. NO MASKS!

For better or worse, the County Health Department has deferred any action on reinstating indoor mandatory

masking. So, it's not clear to me that there is much to discuss. I am, however, alarmed by Councilmember Hadley's comments to the press, suggesting that masking is not supported by science. Councilmember Hadley is misinformed and when she makes comments like that to the press, she embarrasses the City, something she does with some regularity. We are experiencing a surge of an extremely contagious COVID subvariant and the science is abundantly clear that masking protects against contagion. While masking and the overall response to the pandemic has regrettably been politicized to the detriment of the nation's health, Councilmember Hadley how about you stop advancing extremist political views in the name of science as though they represent the views of this community?

What's happened since the negative attention and falsehoods regarding the property of Bruce Beach park is really tragic: we've seen graffiti and vandalism that has never existed prior to BB park notoriety now be a regular unfortunate occurrence; we see consistent trash that includes items from illegal activities(booze bottle, weed items), illegal parking and events that are for profit but without permit ! All because a quiet little beach town has allowed falsehoods, lies and a scam for a ton of money to take over. What happened to the other residents of BB park that had their parcels bought for eminent domain? Other residents were paid far less than the Bruce family and yet these other residents don't seem to have their hand out for money. A very curious situation, it's a shame a legit 3rd party historian wasn't allowed to make an accurate assessment based upon historical facts. MB now wears a scarlet letter "R" for racist. Thanks a lot whomever thought this was a great plan.

At this juncture, the Council has commissioned and accepted an exhaustively researched history of Bruces' Beach and decided on the wording of a new plaque. The County has completed work on its plaque located on the lifeguard station property at the Strand and taken the courageous action of return ownership of the land to the Bruce family. I encourage the City to complete fabrication of and install the City's plaque at the top of the park. Some shrill voices in the community urge denial of the truthful historical record, justifying their revisionist views on fear of monetary liability. There is no basis for the fear mongering - the City cannot incur liability for expressing an opinion (or an apology) one hundred years after the act of racial discrimination took place. What happened in 1924 was unquestionably an act of racial injustice. Let's accept the ugly truth of it, apologize for it and address the consequences of it. In this country, we don't erase the truth. Yet.
