### Limitations

Conclusions, recommendations, and professional judgments presented in this report are based on AECOM's understanding of the project, the assumptions that the data is correct and that the structure and subsurface conditions do not deviate appreciably from those disclosed by the site explorations, an evaluation of the technical information gathered, and the general experience of AECOM in the practice of civil engineering. AECOM does not guarantee the performance of the project in any respect, only that the engineering work and judgments rendered meet the standard of care of the civil engineering profession at this time.

The standard of care for all professional and related services performed or furnished by AECOM under this Agreement will be the care and skill ordinarily used by members of the same profession currently practicing under similar circumstances and in the same locality. AECOM makes no warranties, express or implied, under this Agreement or otherwise, in connection with Contractor's services.

This report has been prepared based on certain key assumptions made by AECOM that substantially affect the conclusions and recommendations of this report. These assumptions, although thought to be reasonable and appropriate, may not prove to be true in the future. The conclusions and recommendations of AECOM are contingent upon these assumptions.

This report is based on data, site conditions, and other information that is generally applicable as of 2020, and the conclusions and recommendations herein are therefore applicable only to that time frame.

This report is for the sole use of City of Manhattan Beach and may not be appropriate for parties and uses other than those explicitly stated herein. Any use or re-use of any portion of this report or any use of this report's findings, conclusions, or recommendations presented herein by any entity other than City of Manhattan Beach is at the sole risk of that entity.
