"Parks make life Better"

The Manhattan Beach Council is considering adding a library and Museum in Polliwog.

MBMS has just completed the Arts building - encroaching into green space at the park.

I would like to suggest alternate locations

The heights library was closed, years ago, by the county and the building is now owned by the city and could be expanded to accommodate all of these needs.

Another location to be considered is the racquetball court location at Marine Av. Park

both of those locations already have parking and would not take away valuable green space from the park.

Unused buildings in the park should be torn down and replaced with more tree and green space, not more buildings.

Thank You

Leslie Loomis

Re: Polliwog Pavilion--2nd library. I strongly oppose this idea. Please consider using the Pay and Play building instead. It already has available parking. Please save all open space that we currently have in Polliwog Park (and other parks). The value of open space in this dense city is enormous, for humans and wildlife, and it's already in short supply. Migrating birds depend on open space to be able to feed and rest and then complete their migrations. Many species are in serious decline in urban areas because they cannot find the resources they need. We need more open space, in my opinion, not less. Thank you.

With summer smog season before us, South Coast AQMD would like to remind cities and residents about our mobile app, a great resource for staying up to date with local air quality conditions. During air quality events such as wildfires, users can check their air quality in real time at the neighborhood level.

The app allows users to personalize features, including customizable notifications when air quality reaches a particular level. Pressing the app's 1-800-CUT-SMOG button places a call to South Coast AQMD's 24-hour complaint hotline, where users and businesses can report smoking vehicles, equipment breakdowns and file other air quality complaints. Users can also find alternative fueling locations with driving directions, weather, South Coast AQMD advisories, announcements, public events and more.

The award-winning app is also available in Spanish and found in both the Apple and Android app stores. For more information, please visit: www.aqmd.gov/mobileapp.
