

Hazards	Projects
Coastal Hazards (Tsunami, Daily Tides, King Tides, El Nino, Beach and Coastal Erosion)	Build a tidal wall to protect the southern section of the strand from coastal hazard impacts.
All Hazards	Provide generators for the Emergency Operations Center (EOC).
Geological Hazards (Earthquake, Landslide)	Install landslide detection and potential protection measures behind Manhattan Village Senior Center. (Public/Private Partnership)
Geological Hazards (Earthquake, Landslide) , Drought	Seismic retrofitting of the Rowell water tower.
Geological Hazards (Earthquake, Landslide) , Drought	Seismic retrofitting of the ground-level water tank at the Rowell complex.
Geological Hazards (Earthquake, Landslide) , Drought	Seismic retrofitting of the Peck Reservoir at 18th and Peck. (This one should be done)
Severe Weather (High Winds, Extreme Heat, Severe Rainstorms), Wildfire, Geological Hazards (Earthquake, Landslide)	Provide backup generators for Manhattan Village Senior Villas.

Severe Weather (High Winds, Extreme Heat, Severe Rainstorms), Wildfire, Geological Hazards (Earthquake, Landslide)

Provide backup generators for City facilities.

Inland Flooding

Create additional water diversion measures to prevent flooding on Marine eastbound towards Sepulveda and near sand dune park.

Notes	Next Steps
Can be 2-3 feet high.	Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.

Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.

Identify the hazard in the plan. No current justification on the slope and landslide risk.	Conduct research on the height of the slope. Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.
--	--

Seismic retrofitting of the Rowell water tower, a 1.6 million gallon ground-level tank at the same hilltop Rowell complex, and the Peck Reservoir at 18th and Peck.

Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.

Seismic retrofitting of the Rowell water tower, a 1.6 million gallon ground-level tank at the same hilltop Rowell complex, and the Peck Reservoir at 18th and Peck.	Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.
---	---

Seismic retrofitting of the Rowell water tower, a 1.6 million gallon ground-level tank at the same hilltop Rowell complex, and the Peck Reservoir at 18th and Peck.

Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.

Ask Amanda if we want to expand this for all senior living facilities.	Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.
--	---

Q for Amanda: Do they want to target it somewhere specific or at each identified location? This was not discussed in the hazard assessment profile for inland flooding, has it flooded in the past? Climate change risk?

Discuss with Amanda to identify responsible party/who to conduct info on vulnerability and impact assessment.

<p>MBFD EM Preparedness Administrator working with Public Works, Environmental Sustainability, Community Development</p>	<p>? - County Beach</p>
<p>MBFD EM Preparedness Administrator working with Public Works, Environmental Sustainability, Community Development, Building and Safety</p>	<p>Discuss re-wording - Chief believes that the HQ is seismically sound as it was built 10 years ago. Consider something related to the generators and the glass wall. Addin fortifying the glass wall as separate project. Provide backup power systems including generators, backup communication systems, etc. expand it.</p>
<p>MBFD EM Preparedness Administrator working with Public Works, Environmental Sustainability, Community Development, Building and Safety</p>	<p>Discuss - May be privately owned property, but may use for shelter, therefore qualifying.</p>
<p>MBFD EM Preparedness Administrator working with Public Works, Community Development, Building and Safety</p>	<p>? - Not confirmed with PW that this is requiring retrofitting</p>
<p>MBFD EM Preparedness Administrator working with Public Works, Community Development, Building and Safety</p>	<p>? - Not confirmed with PW that this is requiring retrofitting</p>
<p>MBFD EM Preparedness Administrator working with Public Works, Community Development, Building and Safety</p>	<p>? - Not confirmed with PW that this is requiring retrofitting</p>
<p>MBFD EM Preparedness Administrator working with Public Works, Parks and Rec., Community Development, Building and Safety</p>	<p>Discuss - We are assuming using the private Villas Senior Living as a shelter, correct? Can this also be for City buildings potentially used as shelters. (Add this as another project)</p>
