

Hermosa Beach Water Conservation Presentation and Workshop
Saturday June 6th, 8:00 AM -1:30 PM **FREE EVENT**

WHY RECYCLE GRAY WATER? JOIN US WITH ED BEGLEY JR AND FIND OUT!

When it comes to taking **personal responsibility for the environment**, few individuals can match the record of actor and activist **Ed Begley, Jr.** No dispute, Ed is the gold standard for green living in the entertainment and environmental community. As an active board member of numerous environmental organizations, his work has earned awards from many groups including, The Natural Resources Defense Council, Coalition for Clean Air, Heal the Bay, Santa Monica Baykeeper and many others.

From **Living with Ed**, his popular TV program about the day-to-day realities of "living green", in his **very** energy efficient home; to his recent interview on the **Oprah Winfrey Show** – ED is the **REAL DEAL** when it comes to **Environmental Issues**. His talk promises to be interesting informative and fun. As the spokesperson for Gray Water Recycling Systems (GWRS) (www.reusegraywater.com), his presentation will be centered around:

"Source Point" Recycling Gray Water *Benefiting you and the Environment*

"Source Point" recycling is a key component to living a sustainable lifestyle. What is it? Simply put, starting and completing the recycling process at the point of original use. If you have a compost pile, wind generator or solar panels, you're already doing it. A GWRS system allows you to "source point" recycle your gray and rainwater. Providing a more self sufficient, sustainable lifestyle and taking you just that much further 'off the grid'.

AFTER ED IS FINISHED – PLEASE STAY WITH US AND LEARN HOW TO PUT YOUR BEST FOOT FORWARD RIGHT AT HOME FOR A GLOBAL SUSTAINABLE FUTURE. REGISTER FOR:

Surfrider Foundation's "Ocean Friendly Gardens" Program Workshop "Be a part of the solution, not the pollution"

Ocean Friendly Gardens (OFG) and parkways utilize **CPR© for the garden** to significantly reduce wet and dry-weather runoff entering the watershed and ocean:

Conserve (a) water, (b) fertilizers, pesticides and herbicides (water pollutants), (c) energy (moving water around the state is the #1 user of energy, (d) and reduce the use of gas-powered maintenance machinery (air pollutants) with use of native or climate adapted plants.

Permeability increased – utilizing materials for a driveway, walkway and patio that allow water to percolate into the soil.

Retention - devices like downspout redirects and rain chains as well as bio-swales, creek beds and dry wells.

Surfrider Foundation's OFG Program Coordinator Paul Herzog: 310-439-2500 pherzog@surfrider.org.

Free public workshop & tools, plus info on incentives!

Workshop Registration: Hermosa Beach City Hall 8:00am-8:30am

Gray water presentation w/Ed Begley, Jr.: 8:30am-9:30am

Ocean Friendly Gardens Workshop: 9:30am-1:30pm

Space is limited - Lite lunch provided for those registered

Register today: 310-371-7222, ext. 200 or www.sbesc.com ("workshops")
